Decommission legacy systems while retaining access to your important data

- Secure data extraction and storage
- Reports defined and created for data access
- Choice of cloud and on-premise solutions

PROCEED CELLA FEATURES

Deployed and supported by our team of experts with full training provided.

Data transfer tool

Extract structured and unstructured business data, including attachments, from your source systems and import into more modern storage with easy access from the Proceed Cella platform.

User-friendly UI

Benefit from a user interface that is intuitive and easy to use, with minimal training required. Proceed Cella's UI is designed to be familiar and accessible to all users.

Customisable search and filtering

Query all of your historical data through a single, centralised application with the ability to customise filtering by modules, sub-modules, tables (including custom tables), and transaction codes.

Rich reporting and viewing options

All data can be viewed in tabular format and exported into MS Excel or PDF, with over 200 predefined business report formats available, including G/L Account Balance Display, Customer Balances, Vendor Balances, and more.

Retention management

Implement retention management for general housekeeping and GDPR purposes. Ad-hoc delete personal data or pre-define retention periods and rules with approval workflows.

Comprehensive security model

Ensure the security of your data with SSO integration and the ability to define user access in detail, including archives, modules, time, company code, and more. All user activity is logged and retrievable with database access restriction and data encryption.

BUSINESS CASE FOR DECOMMISSIONING

Decommissioning allows you to make significant savings, freeing-up the budget and resources to focus on business innovation projects. It reduces business risk and environmental impact by moving away from legacy IT hardware.

15% **Reduce the 15%** of IT budgets typically spent on legacy applications.

80% **See up to 80%** total cost of ownership savings.

Nouryon

We have concluded a very successful project with Proceed, allowing us to remain in compliance with the necessary governing bodies. We now have several people within the organisation that have been fully trained on Proceed Cella, and who have instant access to historical data when required, at the touch of a button. Having been fully trained by the Proceed employees, these staff can now access what they need when they need it.

Jan Reeuwijk, Program Director, Nouryon
