

Simplify data protection compliance for employee data

A comprehensive solution to guide you through the complexities of data protection compliance for employee data.

KEY BENEFITS

Reduced breach impact

Remove data that is beyond its stated purpose, lowering the risk of fines for non-compliance and the impact of a data breach.

Mitigate reputational damage

Lower the risk of significant reputational harm resulting from non-compliance and data breaches.

Cross-system efficiency gains

Removing HR data from SAP leads to streamlined data storage in linked systems, including systems used for business reporting.

Time and effort savings

Reduce the need for time-consuming data retrieval in response to data subject requests by ensuring the data is not present.

750+

completed projects worldwide

20+

years experience managing data

How it works

The offering from Proceed is a packaged solution specifically designed to address the data protection compliance requirements for employee data within SAP systems. The service comprises two parts:

Part 1: Recipe for data protection compliance

- Comprehensive understanding of data protection compliance requirements for employee data within SAP systems.
- Collaborative approach to tailor a step-by-step blueprint using SAP's Data Protection functionality.
- Expert guidance in creating a project plan, identifying potential challenges, and ensuring a smooth implementation.

Part 2: Turnkey deployment

- Seamless building, deployment, and operation of data protection compliance solutions for employee data.
- In-depth knowledge transfer to empower your team in maintaining and managing compliance measures effectively.
- Ongoing support for long-term success in adhering to data protection compliance regulations.

UNIVERSITY OF HELSINKI

"Thanks to our work with Proceed Group, we now have better understanding of how to achieve data protection compliance within our SAP systems. Our university handles massive amounts of personal data and ensuring we're meeting these regulations is essential. We are now well on our way to improving our data protection compliance."

Jere Reinikainen, Head of Development, Helsinki University
